

A green tractor with large, treaded tires is pulling a green harrow across a field. The harrow has a grid of metal bars. The scene is captured from a high angle, showing the tractor and harrow moving from the bottom right towards the top left. The ground is a mix of brown soil and green grass.

Supervised Agricultural Experience Projects

SAE

What is required?

- Each student is required to have an SAE project this year.
- Fall Semester: Students may use their Agriscience Project if they do not already have an ongoing project.
- Spring Semester: Students may select from a variety of options, including owning their project, work experience or volunteering

Do student HAVE to raise an animal?

- The answer is NO
- There are many options for students to choose from. Pick up the SAE topic sheet to see some of the possibilities.
- Just because something isn't on this list, doesn't mean a student can't do it, their project just needs to be cleared by the teacher.

Successful SAE's

Market Hogs

Vegetable Production

Work Experience @ Local Stable

Compost Production & Sales

Laying Hens

Market Lambs
